

• PHYSICAL ORACLE NETWORK

The Reality Oracle for On-Chain Commerce.

DeFi is blind to 80% of economic reality. Signal turns consumer smartphone cameras into physical oracle nodes — capturing real-world supermarket, fuel, and commodity prices across emerging markets, verified by Vision AI and permanently logged to the BOTChain ledger.

Telegram Node: @OfficialSignalOracleBot

Contract: 0x19ab...7243 (BOTChain L1)

DeFi Oracles Only Know Crypto Exchanges.

Traditional oracles (Chainlink, Pyth) monitor digital exchange order books. They have zero visibility into real consumer economies.

The 80% Offline Blindspot

Over 80% of global retail and FMCG transactions in emerging markets take place offline in physical stores, cash counters, and informal markets completely invisible to smart contracts.

30-90 Day Data Lag

Government CPI and inflation indexes lag by 1 to 3 months. Algorithmic stablecoins, FX hedges, and lending protocols cannot manage real-time purchasing power risk.

Hardware Oracle Cost

Legacy DePIN networks require expensive dedicated hardware (~,000 miners), preventing rapid consumer adoption in frontier and developing markets.

SIGNAL NODE COST (ZERO HARDWARE)

Smartphone Cameras as Physical Oracle Nodes.

Turning everyday consumer photos into verifiable, cryptographically logged on-chain commodity data.

01 • Snap

Zero-Friction Ingest

Contributors take a photo of their supermarket receipt, shelf tag, or gas pump inside Telegram. No seed phrase or crypto complexity needed.

02 • Verify

Vision AI Pipeline

Vision AI extracts merchant names, itemized lines, totals, and currency in sub-seconds while filtering duplicate or manipulated submissions.

03 • Inscribe

BOTChain Inscription

Verified basket data is hashed and permanently logged to the BOTChain oracle registry, releasing instant micro-rewards directly to the contributor.

Proof of Ground Truth Consensus

Cross-referencing multiple contributors in the same GPS radius generates statistical price consensus with tamper resistance.

AI OCR + On-Chain Proof

Live Operational Data: Lagos Consumer Basket.

Real receipt verification running live on our deployed OCR & oracle contracts.

RECEIPT AUDIT TRAIL

Merchant: DE WINCARE SUPERMARKET

Location: Lagos, Nigeria (GPS: 6.5244, 3.3792)

Timestamp: 2026-09-08 14:22 UTC

Raw Total: ₦5,300.00 NGN

FX Rate: ₦1,500.00 / USD

USD Equivalent: .53 USDC

OCR Confidence: 98.4%

Sustainable Revenue & Expansion Roadmap.

Monetizing high-frequency ground-truth data feeds for institutional DeFi and enterprise buyers.

Revenue Streams

- **DeFi Oracle Data Subscriptions:** On-chain feeds for inflation-linked bonds, algorithmic stablecoins, and lending protocols.
- **Enterprise & FMCG Analytics:** Real-time brand pricing intelligence for multinational consumer goods brands and hedge funds.
- **API Query Fees:** Micro-payments for real-time local FX pass-through inflation indices.

Roadmap Milestones

- **Q3 2026:** BOTChain Mainnet Contract Live · Telegram Contributor Hub · Brand Overhaul.
- **Q4 2026:** Solana Seeker Native Android APK (MWA + Seed Vault) · BO Wallet DApp Launch.
- **Q1 2027:** Institutional DeFi Oracle Feed SDK · Expansion to 10+ Emerging Market Metro Areas.
